## PROFESSIONAL SUMMARY

---

Results-driven Salesforce Technical Lead & Architect with 9+ years of experience delivering enterprise CRM solutions on the Salesforce Platform. Deep expertise in Salesforce Service Cloud, Sales Cloud, Field Service Lightning (FSL), Agentforce (AI Agents), and Einstein AI — designing scalable, AI-augmented architectures that accelerate business outcomes. Certified Application Architect and 12x Salesforce Certified professional.

Proven track record leading cross-functional engineering teams, designing multi-cloud Salesforce architectures, and delivering enterprise integrations using REST/SOAP APIs, MuleSoft, and modern automation platforms including N8N and Zapier. Experienced in AI-powered low-code development using Lovable.dev and Claude Code (Anthropic), enabling rapid prototyping and intelligent workflow automation within Salesforce ecosystems.

Skilled at driving Salesforce platform roadmap, solution governance, DevOps best practices (CI/CD, Salesforce DX, Copado), and implementing Agentforce Agent Builder, Prompt Builder, and Einstein Copilot to deliver next-generation AI-driven CRM capabilities at enterprise scale.

## CORE COMPETENCIES

---

**Salesforce Tech:** Apex, LWC, Aura, Visualforce, Flows, SOQL, SOSL, REST/SOAP APIs, Platform Events, Pub/Sub API

**Agentforce & AI:** Agentforce Agent Builder, Prompt Builder, Einstein Copilot, Einstein GPT, Einstein Analytics, AI Actions

**Salesforce Clouds:** Sales Cloud, Service Cloud, Experience Cloud, Field Service Lightning, Revenue Cloud, Tableau CRM

**Architecture:** Solution Architecture, Enterprise Architecture, Multi-Cloud Strategy, Platform Governance, Well-Architected Framework

**Field Service:** Work Orders & Work Types, Scheduling & Optimization, FSL Mobile App, Service Territories & Resources, Dispatcher Console

**Service Cloud:** Omni-Channel Routing, Entitlement Management, Case Management, Knowledge Base, Messaging for In-App & Web

**AI & Automation:** N8N (workflow automation), Lovable.dev (AI app builder), Claude Code (Anthropic), ChatGPT API, Prompt Engineering

**Integration:** MuleSoft, REST/SOAP APIs, CDC (Change Data Capture), Platform Events, Heroku Connect, External Objects

**DevOps & Tools:** Salesforce DX, VS Code, Copado, GitHub, Bitbucket, Jenkins, CI/CD Pipelines, Jira, Gearset

**Soft Skills:** Stakeholder Management, Executive Communication, Cross-functional Leadership, Solution Design, Agile Delivery

## PROFESSIONAL EXPERIENCE

---

**TEKsystems Global Services | Salesforce Senior Technical Lead** *Dec 2021 – Present* India

- Lead end-to-end Salesforce solution architecture for enterprise CRM implementations supporting large-scale, high-volume customer service operations across Sales Cloud, Service Cloud, and Experience Cloud.
- Architected and deployed Agentforce AI Agents using Agent Builder and Prompt Builder, enabling autonomous case resolution workflows and reducing manual agent handling time by 30%.
- Designed Einstein Copilot customizations with custom Actions and Topics to drive AI-assisted service recommendations and intelligent case deflection.
- Leveraged N8N for complex multi-step workflow automation, connecting Salesforce with external SaaS platforms, ticketing systems, and data warehouses without custom middleware.
- Prototyped internal Salesforce utility tools using Lovable.dev (AI-powered app builder) and Claude Code (Anthropic), accelerating proof-of-concept delivery by 60%.
- Implemented Salesforce Service Cloud capabilities including Omni-Channel Routing, Entitlement Management, SLA milestones, and automated case escalation workflows.

- Defined platform roadmap and architecture strategy aligning Salesforce capabilities with business transformation goals; presented to C-suite and senior stakeholders.
- Led development teams delivering Apex triggers, batch jobs, LWC components, and enterprise REST/SOAP integrations with ERP and third-party platforms.
- Established platform governance, security reviews, and coding standards ensuring scalable, well-architected multi-tenant Salesforce environments.
- Championed CI/CD adoption using Salesforce DX, Copado, and GitHub Actions, reducing release cycle time by 40%.

#### **Field Service Lightning (FSL) — Enterprise Rollout (500+ Users)**

- Architected and led the enterprise-scale Field Service Lightning implementation supporting 500+ field technicians and dispatchers across multiple service territories.
- Designed end-to-end Work Order and Work Type configuration, including multi-step job plans, required skills mapping, and asset-linked service tasks to standardize field operations.
- Implemented FSL Scheduling & Optimization (Enhanced Scheduling + Optimization) with custom scheduling policies, priority rules, and travel-time-aware auto-scheduling to maximize dispatcher efficiency and reduce SLA breaches by 35%.
- Configured the FSL Dispatcher Console with filtered territory views, real-time Gantt scheduling, and custom list views — enabling dispatchers to manage high-volume daily workloads with full visibility.
- Deployed and customized the FSL Mobile App for field technicians, enabling offline-capable work order management, real-time status updates, digital signature capture, and photo attachments in low-connectivity environments.
- Defined Service Territories, Service Resources, and Operating Hours across multiple geographic regions, ensuring accurate capacity planning and resource-to-territory alignment.
- Integrated FSL with backend ERP and inventory systems via REST APIs and Platform Events to enable real-time parts availability checks and auto-triggered replenishment orders from the field.
- Built custom LWC components embedded in the FSL mobile and desktop experience to surface contextual Knowledge Articles and AI-recommended next steps during field service visits.
- Drove a 40% improvement in first-time fix rate and reduced mean time to resolution (MTTR) by 28% through optimized scheduling, skills-based routing, and field technician productivity enhancements.

#### **Shell India Pvt Ltd | Salesforce Technical Lead** *Jul 2019 – Dec 2021* India

- Owned Salesforce platform architecture and technical strategy supporting enterprise CRM initiatives across Sales and Service Cloud.
- Implemented Einstein AI features including Next Best Action, Einstein Activity Capture, and predictive scoring to enhance sales team productivity.
- Built N8N-based automation workflows integrating Salesforce with SAP ERP, SharePoint, and internal data lakes, replacing legacy point-to-point integrations.
- Designed and implemented custom objects, validation rules, complex approval processes, Lightning automation (Flows), and Apex-based integrations.
- Led cross-functional teams delivering Salesforce projects on time; managed sprint planning, backlog grooming, and stakeholder demos under Agile/Scrum methodology.
- Improved operational efficiency by 25% through CRM automation, Omni-Channel routing optimization, and service workflow redesign.

#### **L&T Infotech | Salesforce Consultant** *Aug 2018 – Jul 2019* India

- Designed scalable Salesforce solutions including custom objects, complex workflows, Process Builder automation, and system integrations using REST APIs.
- Migrated legacy Visualforce applications to modern Lightning Web Components (LWC), improving performance and user experience significantly.
- Introduced Prompt Engineering concepts and early-stage Einstein GPT pilots for knowledge article suggestions within Service Cloud.
- Provided technical leadership across the full Salesforce implementation lifecycle, managing risks, dependencies, and delivery milestones.
- Conducted architecture reviews and solution design workshops with client stakeholders to ensure alignment with Salesforce best practices.

## **Brillio | Salesforce Business Analyst** Jan 2018 – Aug 2018 India

- Gathered and analyzed business requirements, translating them into detailed Salesforce technical specifications and user stories.
- Collaborated with business stakeholders and product owners to align CRM system functionality with operational and strategic goals.
- Developed reusable Lightning components using Aura framework; contributed to Flow Builder automation replacing manual business processes.
- Supported integration mapping between Salesforce and external systems, documenting API contracts and data flow diagrams.

## **Infosys BPM | Salesforce Administrator** Jun 2016 – Jan 2018 India

- Administered Salesforce CRM platform including user management, profiles, roles, permission sets, and security controls.
- Customized Lightning pages, record layouts, and App Builder configurations to improve user experience and team productivity.
- Built declarative automations using Workflow Rules, Process Builder, and Approval Processes reducing manual operational tasks.
- Supported UAT, testing cycles, production deployments, and system maintenance ensuring platform stability and data integrity.

## **AGENTFORCE & AI PLATFORM EXPERTISE**

---

### **Salesforce Agentforce (Einstein AI Platform)**

- Agentforce Agent Builder — designed and deployed autonomous AI agents for case triage, FAQ resolution, and order status handling.
- Prompt Builder — built dynamic, context-aware prompt templates grounded in CRM data for Einstein Copilot actions.
- Einstein Copilot — configured custom Topics, Actions, and Instructions to extend AI assistant capabilities for service and sales teams.
- Einstein GPT — implemented AI-generated case summaries, email drafts, and knowledge article suggestions within Service Cloud.
- Model Context Protocol (MCP) — evaluated MCP-based integrations for connecting Salesforce Agentforce with external AI models and APIs.

### **AI-Powered Development Tools**

- Claude Code (Anthropic) — used AI-assisted coding for Apex class generation, LWC scaffolding, SOQL optimization, and automated code review workflows.
- Lovable.dev — built internal admin portals and Salesforce companion tools using AI-powered app generation, reducing frontend development effort by 50%.
- N8N (Open-Source Workflow Automation) — designed Salesforce-integrated automation workflows connecting CRM data with Slack, Google Workspace, Jira, SAP, and custom webhooks.
- ChatGPT / OpenAI API — integrated LLM capabilities into Salesforce via Apex callouts for intelligent text summarization and sentiment analysis on case data.
- Prompt Engineering — skilled in crafting precise, role-grounded prompts for Salesforce Prompt Builder, Einstein, and external LLM APIs.

## **CERTIFICATIONS**

---

- Salesforce Certified Application Architect
- Salesforce Certified Platform Developer II
- Salesforce Certified Field Service Consultant
- Salesforce Certified Advanced Administrator
- Salesforce Certified Service Cloud Consultant
- Salesforce Certified Platform Developer I
- Salesforce Certified Platform App Builder
- Salesforce Certified Administrator
- Salesforce Certified Agentforce Specialist

## EDUCATION

---

**Master of Business Administration (MBA) | 2013 – 2015**

**Bachelor of Computer Science | 2010 – 2013**

## TECHNICAL SKILLS

---

**Salesforce:** Apex, LWC, Aura, Visualforce, SOQL, SOSL, Triggers, Flows, Platform Events, Change Data Capture, Pub/Sub API

**Agentforce:** Agent Builder, Prompt Builder, Einstein Copilot, Einstein GPT, Next Best Action, Einstein Analytics, AI Actions

**Field Service:** Work Orders, Work Types, Scheduling & Optimization, FSL Mobile App, Service Territories, Resources, Dispatcher Console

**AI Tools:** Claude Code, Lovable.dev, N8N, ChatGPT API, OpenAI API, Prompt Engineering, MCP (Model Context Protocol)

**Integration:** MuleSoft, REST APIs, SOAP APIs, Heroku Connect, External Objects, Named Credentials, OAuth 2.0

**DevOps:** Salesforce DX, Copado, GitHub, Bitbucket, Jenkins, Gearset, CI/CD, Git branching strategies

**Tools:** VS Code, Jira, Confluence, Data Loader, Workbench, Postman, Slack, Data Cloud

**Technologies:** HTML5, CSS3, JavaScript, TypeScript (basics), JSON, XML

**Methodologies:** Agile, Scrum, SAgile, Waterfall, Design Thinking, Well-Architected Framework
